Dear Colleague

Request for a Psychological Assessment Report for Civil Proceedings

Thank you for your enquiry. Please find attached a copy of my CV and a summary of the type of expert reports we provide for employment, civil and immigration claims.

If you require the services of a psychiatrist, psychologist or medical practitioner with different expertise to mine, please advise of the same by return. Once I have sight of the information requested I would allocate your case to the most suitable psychologist, psychiatrist or general medical practitioner in our practice to take your case forward.

How to book your free initial advisory call

To arrange an initial free telephone advisory call to discuss your client's needs, please email my customer care team on wecare@advancedassessments.co.uk with your name, phone number and the best time to call you back in the subject header. Alternatively, you may contact us on 0208 2000078.

Free initial advisory calls are only available to solicitors, barristers or other qualified legal professionals. There is a fee of £75 for the initial advisory call if a lawyer does not represent you. You can pay the fee for the initial advisory call by PayPal. If you wish to pay by PayPal, please advise us of this by return, and we will arrange for Sankofa Financial Services Ltd (who handle our credit card transactions) to send you a credit card invoice. Alternatively, you can pay the initial advisory call fee by bank transfer to:

Advanced Assessments Ltd
Account number: 14120135
Sort Code: 52-10-33

Bank: NatWest

Please include your name as the reference.

How much will the expert witness medico-legal report cost?

Before the date of the initial advisory call, to advise on costs and prepare an estimate I need the following information:

1. An indication of the deadlines of the report;
2. A detailed draft letter of instruction setting out exactly the questions that you would like the expert witness to consider;
3. Copies of all of the relevant NHS and private medical notes;
4. Copies of educational records, including psychologist's assessments, if applicable;
5. The Claimant's disability statement, for Equality Act 2010 claims;
6. Relevant witness statements and/or proofs of evidence;
7. Reports of the opposing party's experts if available;
8. All the Claimant's pleadings including, Particulars of Claim, Letter before Claim, ET1 or application to the Tribunal as appropriate;
9. All the Defendant's pleadings including, the ET3, Defence (and counterclaim, if applicable)
10. A schedule of loss, if applicable;
11. All related interlocutory Orders and case management decisions;
12. Counsel's advice on expert evidence;
13. Any personnel file (in employment cases);
14. Details of what your client's first language is and whether an interpreter will be necessary;
15. In indication of your client's current mental state;
16. Name of the opposing party, so that a conflict of interest check can be carried out; and
17. Any reports held by Adult Social Services, Children's Services; and CAFCASS, if relevant.

Could you please send us this information electronically by email (or by a link to a file such as Dropbox with a further paper copy by post). We need to see all documents, which would assist or harm your case. Please do not send original documents at this stage. We regret that without seeing this information, we are unable to provide an estimate for the medico-legal report.

I can advise that the current hourly rate for our psychologists is a minimum of £200 per hour plus VAT. Your bill would need to be paid before the release of the report.

Our fee structure for expert witness reports is organised into five levels linked to how you intend to use the report and the complexity of issues we must consider in discharging our duty to the court. The five levels of reporting we offer are:

- (1) **Preliminary expert witness reports:** these assessments are designed for clients who are considering whether to use expert evidence in proceedings but are not sure whether there is sufficient medical evidence to defend or bring a claim. This level is sometimes suitable for occupational health assessments where the employer might be considering disciplinary action or dismissal. The minimum amount of time we devote to these triage reports is 7.5 hours. This equates to a fee of £1,500 plus VAT. If you proceed to a report at Level 1 or above the cost of the preliminary expert witness report will be credited to the overall fee, thus reducing the costs.
- (2) **Level 1 expert witness reports:** The minimum amount of time that is required to produce a report that is suitable for use in legal proceedings is 25 hours. Reports drafted in less than 25 hours are likely to be a false economy — they do not meet the rigorous minimum standards required of a competent expert witness psychologist. We operate on the reputation of rigorous

analysis and high-quality work. Our overriding duty is to the court, and we have found through experience and analysing the reports of other experts that it is not possible to produce a quality expert psychologist report in less than 25 hours. We normally work much longer than the number of hours given in our cost estimates without additional charge to produce robust reports that result in early settlement of claims, thus reducing the overall cost of litigation.

- (3) **Level 2 Expert witness reports:** more comprehensive coverage is often required. Where this is the case, it might take 27 to 50 hours to properly answer the questions that need to be addressed by the court.
- (4) **Level 3 Expert witness reports:** more complex cases such as those involving neuropsychological assessment are likely to take between 51 to 72 hours to complete proficiently.
- (5) **Level 4 Expert witness reports:** assessments of more than one individual or assessments of very complex injury are likely to take more than 72 hours to skilfully complete.

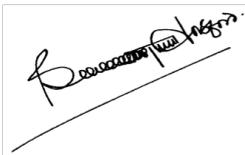

Cases with fewer documents for assessment are not always less complex. The amount of time required will ultimately depend on the quality of the evidence, the complexity of the instructions and factors which relate to the individual who is to be assessed. Thus, it is impossible to advise on the costs of the assessment without seeing all the evidence.

If your client is currently in receipt of legal aid, we are only able to carry out an assessment at the legal aid rate if you can provide proof of public funding in the form of a document bearing the current Legal Aid Agency reference number or unique funds number (UFN).

Thank you again for your enquiry, we look forward to working with you.

Kind regards

Yours faithfully

Dr Bernard Horsford
Consultant Chartered Psychologist and Neuropsychologist

SUMMARY PROFILE

I have built up a practice with many solicitors, insurance companies, local authorities and government departments. I also take instructions directly from individuals. I have appeared in and prepared reports for, the County Court, the High Court, Crown Court, magistrates' court and Tribunals for both defendants and claimants. I am known for my hard work, excellent client care and meticulous preparation of cases, often exceeding 40,000 pages. My background in business and human resources is a strength when advising on white-collar crime, health and safety and regulatory proceedings. I have over 20 years' experience in the assessment of individuals in occupational, forensic, clinical and educational settings. I cover all areas of personal injury and medical negligence including the ability to work; road traffic accidents; anxiety; mental health, psychological harm, workplace injuries, workplace stress, occupational health, ill health retirements, bullying, sexual abuse, post-traumatic stress disorder (PTSD) and neuropsychological assessments. I have considerable experience in equality and diversity. Specialist interests include assessment of head injuries and memory loss, psychological testing, children, families, assessment of intellectual functioning, and assessments that consider the impact of drugs, alcohol and strokes. I have experience in assessing the effects of injury on the loss of earnings. Solicitors consistently praise my work; my expert reports have frequently secured convictions and acquittals. More than 95% of cases settle on the basis of my reports. Waiting times are short.

Key Specialities

- Neuropsychological assessments and personal injury
- Evaluation of employment and discrimination claims
- Crime and evaluation of offenders
- Mental health and mental capacity assessments
- Impact of cognitive/intellectual functioning on ability to parent
- Assessment of malingered neuropsychological and psychiatric disorders
- Children and special educational needs

**Expert Witness Services for
Employment Lawyers**

Expert Witness Service for Employment Lawyers

We provide one of the most comprehensive employment expert witness service in the United Kingdom. You will have access to a multi-disciplinary team of leading psychologists, human resource experts, psychiatrists and occupational health physicians. Our expert witness service encompasses the whole range of employment law needs, providing timely and comprehensive reports for employment tribunals, county court and high court claims.

We work in the following markets:

- Private sector
- NHS
- Central government
- Local government
- Charities and social enterprises

We are often instructed to report on claims arising out of working conditions, organisational change, restructuring, workplace stress, bullying and harassment, discrimination and disability at work. We assess rehabilitation after illness and make recommendations on reasonable adjustments.

Assessment and treatment of occupational stress is a particular feature of our work. We report on the vocational effects of brain injury, psychological damage and severe trauma, such as spinal cord injuries, amputation, or other health issues that impede employment or career.

Typical reports cover the following areas:

- Advising on the fairness of reward and remuneration systems
- Pay and benefits claims, including equal pay and equal value claims
- Job evaluation claims
- Employment demographics and statistics
- Discrimination in employment in respect of race, gender, age, disability sexual orientation and religion and belief
- Psychological injury arising from unfair dismissal and redundancy
- Assessment of discrimination in recruitment and selection
- Psychological effects of physical disability
- Personal injury and fatal accidents
- Personal injury rehabilitation
- Cost of injury, disability and death

- Loss of future earnings and pension rights
- Career and employment prospects
- Potential earning assessments
- Employment disputes linked to established practices
- Fitness to work assessments
- Financial quantification of injury/death
- Loss of income and loss of profits
- Rehabilitation assessments
- Vocational evaluation of the cost of injury
- Employment prospects and employability
- Workplace issues and adaptations for disabled people
- Medical injury — quantum in employment cases
- Employment and disciplinary disputes
- Harassment investigations and reports
- Business valuation/loss
- Insurance claims assessment, investigation and loss adjustment
- Occupational stress
- Psychological testing
- Workplace hazards
- Human contributory factors in accidents
- Fitness to work following personal injury
- Failure to recover/suspicion of malingering

We offer knowledge and experience of a broad range of occupations and industries. Clients are normally seen within a week of confirmation of funding and reports are normally released within two weeks.

Occupational Health Assessments

Our consultants have a wide range of expertise in occupational health and well-being.

We have a range of proactive and reactive services that will improve productivity, boost morale and effectively manage mental health and well-being issues in your organisation.

Here is a summary of what our occupational health team does:

- We assess what an employee can and cannot do following illness or injury
- We assess and recommend reasonable adjustments in accordance with the Equality Act 2010
- We assess psychological injury in unfair dismissal claims
- We assess the health risks and liability for redundancy and restructuring
- We carry out independent assessments for ill-health and early retirement
- We assess discrimination claims involving race, gender, disability, sexual orientation and religion and belief

Expert Witness Services for Personal Injury Lawyers

Expert Witness Service for Personal Injury Lawyers

We provide the most comprehensive personal injury expert witness service in the United Kingdom. You will have access to a multi-disciplinary team of leading psychologists, human resource experts, psychiatrists, occupational health physicians and medical specialists. Our expert witness service encompasses the whole range of your personal injury claim needs. We provide timely and comprehensive reports for employment tribunals, county court and high court claims.

We work in the following markets:

- Private sector
- NHS
- Central government
- Local government
- Charities and social enterprises

We are often instructed to report on claims arising out of road traffic accidents, working conditions, restructuring, workplace stress, bullying and discrimination. We assess rehabilitation after illness and make recommendations on reasonable adjustments.

We regularly prepare medico-legal reports on *adults* and *children* in personal injury claims. We assess Post Traumatic Stress Disorder (PTSD), depression, and mental health problems following a road traffic accident (RTA), bullying at work, school or other distressing incidents. We advise on fitness to return to work and/or therapeutic requirements with timescales and costs.

We typically work with the following:

- Solicitors
- Barristers
- Human resource professionals
- Occupational health and well-being departments
- Insurers and re-insurers
- Trade Unions and professional associations
- Claims management companies, case managers, and rehabilitation companies

Our service is divided into seven practice areas:

1. Adult personal injury assessments

This comprehensive expert assessment service includes immediate post-accident assessment, current symptoms, pre-accident history, treatment implications and prognosis. Pre-interview questionnaires and tests are used. These assessments usually relate to injuries that have occurred in public places.

2. Child personal injury assessments

When a child is under 10 or 11, they are given a brief and friendly interview, after which their parent is interviewed in depth. Assessments on young people are typically carried out by one of our specialist child psychologists.

3. Brain injury and neuropsychological assessments

This is carried out when any type of intellectual (cognitive) functioning is impaired following a head injury, concussion or brain disease. It involves a comprehensive series of tests plus, where appropriate, interviewing of relatives.

4. Chronic pain assessments

This provides a comprehensive assessment of the psychological aspects of chronic pain. It assesses pre-injury history of pain complaints plus post-injury coping strategies. Pain management treatment options are recommended.

5. Employment, stress and absence assessments

These include either individual or organisational assessments of stress or other psychological illness and the impact that they have on the individual or the organisation. A summary of the employment difficulties is presented, along with practical strategies to reduce absence cases caused by stress and other psychological conditions.

6. Road traffic injury assessments

These assessments typically are prepared in complex road traffic claims. We provide an objective assessment of the full set of injuries and with particular emphasis on issues such as PTSD and phobias that may of developed as a result of the injury.

7. Therapy and support

We also provide psychological therapy carried out by experienced therapists using up-to-date treatment techniques such as:

- Cognitive behavioural therapy
- Psychodynamic psychotherapy and Integrative therapy
- Therapy underpinned by attachment theory and other systemic therapy approaches
- Cognitive analytical therapy
- Cognitive rehabilitation and Brief therapy
- Counselling

Typical personal injury issues that we prepare reports on:

- Road traffic accidents
